

David Horowitz' *The Professors*

Publisher's Book Description

Bestselling author David Horowitz reveals a shocking and perverse culture of academics who are poisoning the minds of today's college students. *The Professors* is a wake-up call to all those who assume that a college education is sans hatred of America and the American military and support for America's terrorist enemies.

From the Inside Flap

Coming to a Campus Near You: Terrorists, racists, and communists: you know them as *The Professors*. We all know that left-wing radicals from the 1960s have hung around academia and hired people like themselves. But if you thought they were all harmless, antiquated hippies, you'd be wrong. Today's radical academics aren't the exception they're legion. And far from being harmless, they spew violent anti-Americanism, preach anti-Semitism, and cheer on the killing of American soldiers and civilians all the while collecting tax dollars and tuition fees to indoctrinate our children. Remember Ward Churchill, the University of Colorado professor who compared the victims of the September 11 terrorist attacks to Nazis who deserved what they got? You thought he was bad? In this shocking new book, New York Times bestselling author David Horowitz has news for you: American universities are full of radical academics like Ward Churchill — and worse.

Horowitz exposes 101 academics representative of thousands of radicals who teach our young people who also happen to be alleged ex-terrorists, racists, murderers, sexual deviants, anti-Semites, and al-Qaeda supporters. Horowitz blows the cover on academics who: Say they want to kill white people. Promote the views of the Iranian mullahs. Support Osama bin Laden. Lament the demise of the Soviet Union. Defend pedophilia. Advocate the killing of ordinary Americans.

David Horowitz's riveting exposé is essential reading for parents, students, college alums, taxpayers, and patriotic Americans who don't think college students should be indoctrinated by sympathizers of Joseph Stalin and Osama bin Laden.

The Professors is truly frightening and an intellectual call to arms from a courageous author who knows the radicals all too well.
